

Gentlemen,

Please do not allow the expansion of the BPL mode and frequency usage into the area currently occupied by the Ham Radio bands ie 2-80 MHZ as the interference generated will effectively destroy all use of these frequencies for communications and render our equipment useless. This hobby is a vital backup to our country in times of crisis as can be witnessed by recent events such as 911 and more recently the east coast blackout. We are destroying the rights of our citizenry to enjoy a viable hobby in order to line the pockets of utilities with profits that are no relation to their primary business which is providing reliable, affordable electric power.

Please stop the expansion of BPL now !

Sincerely,

Bruce Bodine

KA0MLA
